

DENTAL GRADUATE ATTRIBUTES

At the completion of the undergraduate training programme the graduates should be:

- Capable of applying knowledge and skills in daily practice
- Capable of applying ethical principles
- Able to undertake self-assessment and willing to update knowledge and skills on a regular basis
- Possessing a minimal level of computer proficiency to enhance knowledge and skills;
- Capable of referring patients for consultation and specialized treatment
- Capable of diagnosing oral and dental problems, analyzing and arriving at a diagnosis using proper scientific knowledge and appropriate investigations.
- The ability to handle emergency circumstances at a dental office as well as in public places.
- Capability to impart education at the community level through oral health promotion.
- Knowledge of how to use modern information technology for documentation, such as patient records, communication with patients, information management, and health-care applications.

EVALUATION:

To measure the attainment of dental qualities, the college uses both objective and traditional evaluation methods. Objective techniques to student evaluation, such as OSPE/OSCE, are provided, in which the student's depth of knowledge, clinical skills, communication skills, and other skills are measured. The traditional evaluation method consists of answering a set of questions, one-on-one viva-Voce, and identifying spotters in a specified time.
